DETAILED ACTION

Statement of Reasons for Allowance

Claims 1-4 are allowed.

The following is an examiner's statement of reasons for allowance: the best prior art of record, Jacobsson et al. discloses an oscillator comprising a plurality of pairs of differential transistors (T1,T2,T1',T2'), a feedback capacitor element(C1,C2,C1',C2') that connects the mutual collector and base of each of the pairs of transistors. Collectors of the transistors are connected via capacitors, (C3,C4,C3',C4'); Pham discloses a multi-band oscillator having a plurality capacitor elements (C0, C1) for switching the oscillation frequency band via switching means (TRS0, TRS1). Although two references show all the physical elements as recited in the claims, one of ordinary skill in the art would not have been motivated to have the arrangement of "only one pair of oscillation transistors corresponding to said capacitor element connected to said switching means which is turned on is placed in an operating condition", as set forth in the claims. It is also noted that although Li et al. (Figures 8,9,11) and Christensen (Figure 3) disclose all the physical elements as recited in the claims, one of ordinary skill in the art would not have been motivated to have the arrangement of "only one pair of oscillation transistors corresponding to said capacitor element connected to said switching means which is turned on is placed in an operating condition", as set forth in the claims

Art Unit: 2817

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Joseph Chang whose telephone number is 571 272-1759. The examiner can normally be reached on Mon-Fri 0700-1730.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Robert Pascal can be reached on (571) 272-1769. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
